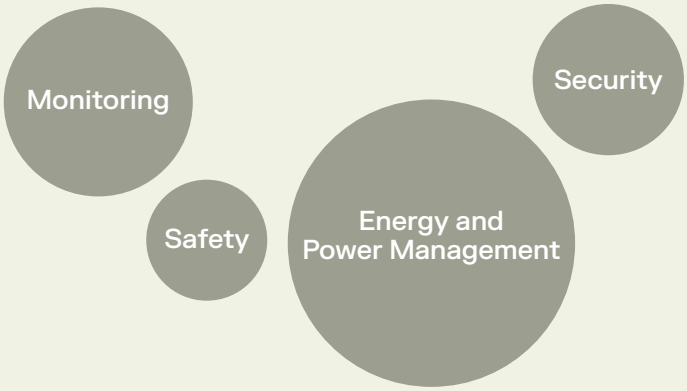
besecke smart automation

AllViu

Next Level Visualization Platform

With the latest generation of our visualization platform AllViu, we are your partner for customized and scalable visualization of all relevant systems.



Integrated subsystems:

BEVISION
Monitoring, Alarm and Control System

BEWATCH
Bridge Navigation Watch Alarm System

BEMOTION
Heli-Motion

BESAFE
Safety Station

BEENERGY
Power Management

BESECUR
Yacht Security

AllViu – All Visualized

- Flexible HMI solution for various vessel applications
- Intuitive operation – user centric designed
- Modern look and feel for a fast and easy use
- Trackball control and touch screen operation supported
- Vectorized mimics: Automatic adaption to screen resolution and aspect ratio
- Multiple systems, such as beVISION and beSECUR can be combined into a complete integrated solution
- OPC UA connectivity framework – Open communication protocol to application hardware

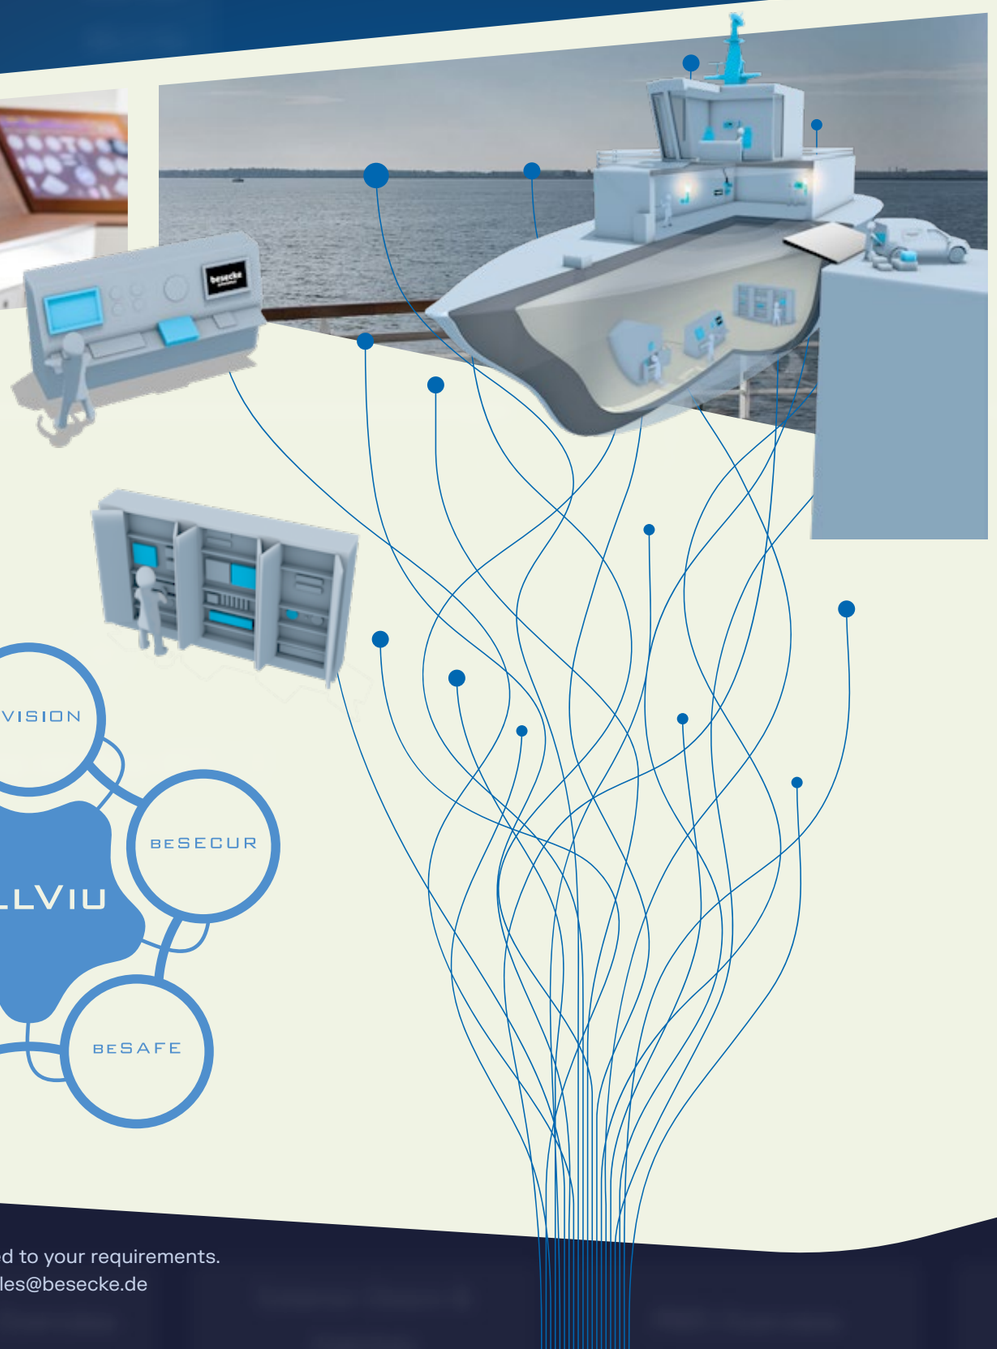
New and Unique Features

System dashboards
Status overview at a glance

User defined widgets
Screen layout adjustable to operator needs

Visualization brightness modes
Clear view at day and non-dazzling night display

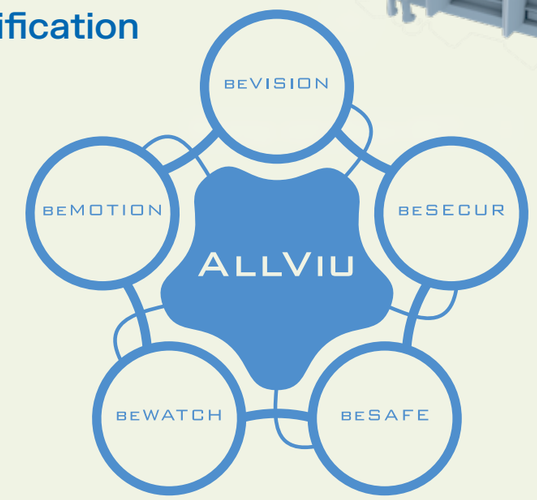
User login
Personalized operator roles



ALLVIU
BEVISION

Visualization System for Intuitive Operation and Notification

- Highly reliable system architecture
- Dezentralized concept – reduction of cabling, weight, space, and costs
- Scalable layout – up to 20,000 I/Os
- High level of functional integration
- Multiple interfaces support
- Integrated online diagnostics for fast failure recognition, data analytics, and graphical trend mimics



ALLVIU
BESECUR

Exhaustive Yacht Security

- Enhanced vessel entry stations
- Inconspicuous thermal scan: Covid alarm at vessel entry
- Integrated crew information and check-in system
- Collision avoidance – forward looking sonar systems
- Tender tracking: ROV and SUB integration
- State-of-the-art door access system
- CCTV: multiple IP camera support
- Integration of night view camera
- Underwater intruder detection
- Outer perimeter surveillance with anti-drone solutions

besecke smart automation: Automation and System Technologies Around the World

Flexible, precise, efficient and transparent – this is a perfect description of our automation and systems technologies at besecke GmbH & Co. KG. We deliver comprehensive solutions for customers around the world, and send our own employees to help plan these on-site. We focus specifically on the field of Maritime Systems. Our second major business segment is industrial automation for the food, automotive and special machinery sectors.

Our team of around 180 employees develops innovative, customised solutions every step of the way – from planning to implementation. We also provide an extensive range of services to support you during operations, and our interdisciplinary project teams are available to work closely with you throughout the process. Our aim is to design and implement reliable, effective automation and systems solutions in line with your needs – with the independence to draw our components from all different manufacturers.
